

Adding Climbs and Routes Guide

This guide explains how to create a new climb, edit it, and upload a beta video.

To get started, go to <https://main.betabouldersapp.com> on the desktop or open the app on your phone. NOTE: You must have a gym or setter account to add a climb.

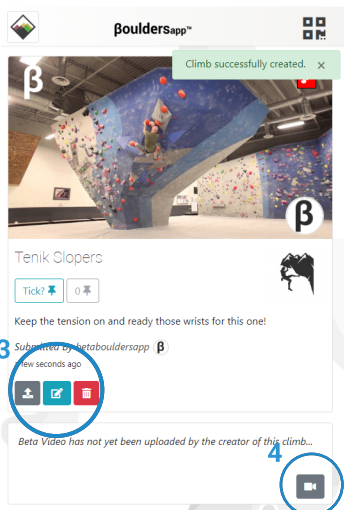

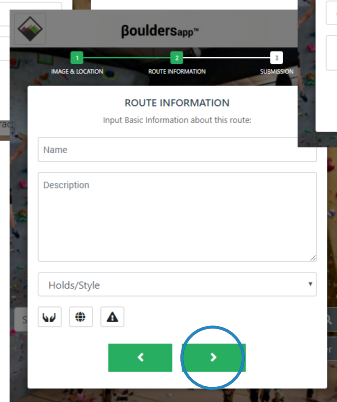

Est. time: 3 mins

- 1 Navigate to the gym's page and click the green plus icon.

- 2 Complete the 3 step form by first uploading an image of the climb. Fill out the required information for difficulty, setter, area, etc.

- 3 After creating the climb, you can edit, upload a new image, or delete the climb using these buttons viewable only by you.
- 4 Upload a video showing the beta or just the crux.

NOTE: Record the video in lowest settings to allow for smooth upload. Keep it under a minute and record the video beforehand to upload.

Your view

Users' view

- 5 Annotate the climb to give text hints at key areas. To begin, select where you want the hint to be located and fill out the corresponding text.

Once done with all the hints, click save. To start all over, hit reset.

Users can hover above the text to get hints to areas of the climb they are struggling with instead of watching a video.
